Learn the advantages for surgeons,
surgical centers + personal injury attorneys

ADVANTAGES OF WORKING WITH EMPATHY to ADD PROFESSIONAL AT-HOME CARE

for ATTORNEYS:

- Adding home health care reinforces the significance of client's surgery.
- Professional caregivers deliver stronger documentation, helping personal injury attorneys build stronger cases, leading to more successful outcomes and, potentially, better settlements.
- Home health lowers medical costs.
 - Far less expensive than in-hospital care.
 - Minimizes chance of re-injury.
 - Better, faster recovery (*vs. non-professional care or self-care*).
- Attorney consulted *in advance* on cost of care.

for SURGICAL CENTERS:

- Make sure the patient gets home okay.
- Explain medications once patient is home.
 - When to take | How often to take |
 - Side effects | Any problem, contact doctor.
- Explain the doctor's instructions.
 - Prevent potential injuries.
 - Increases patient compliance.
- Educate in-home non-professional caregiver (*i.e., spouse, family, friend, etc.*) on meds + medications + doctor instructions.
- Making sure the home is safe.
 - Remove potential hazards to prevent re-injury.
- Making sure the home is clean.
 - Minimize the possibility of infection.

Let's talk about working together to create a better outcome.
