# About HHF

---

*a.k.a. why we're a good partner for you.*

**#1 We know personal injury from the inside.** HHF owner – Dr. Bruce Osler – has owned and operated a home health agency, and currently runs a nurse registry and multiple conservative care operations. We know firsthand how personal injury cases impact your overall operations, and how our work can, *and will*, improve + simplify the way you do business.

**#2 We're in this for the long haul.** Every case is different. Some are straightforward and others require a little something extra. HHF will help bring every case to a conclusion that's right for the individual circumstances of that case. Being open and flexible – and taking a long view of our working relationship – results in better outcomes for everyone, especially your patient/client.

**#3 We believe everybody can win.** Personal injury cases are typically strewn with obstacles that make it unnecessarily difficult for you (*i.e., surgeons, attorneys and home healthcare agencies*) to best serve victims of personal injury. HHF removes those obstacles so you can deliver the very best outcomes for your patients + clients. That leads to enhanced professional reputations and better medical + financial outcomes for the people you serve.

## Making personal injury work better for everyone

Surgeons + Surgical Centers  
Personal Injury Attorneys  
Home Health Agencies  
Personal Injury Patients/Clients

*We make it possible for you to*  
**DELIVER BETTER  
OUTCOMES**  
*for your personal injury  
patients & clients.*

# HomeHealth Financial

*open up ... learn how we support you =====>*

*We all share the common goal of delivering the best outcome to victims of personal injury.*

## **SURGEONS + SURGICAL CENTERS**

Surgeons' post-surgical care options for personal injury patients are currently limited to expensive in-hospital care or at-home recovery without professional care. Those are sub-optimal for the patient and, in some cases, the surgeon. We make it possible for these patients to recover at-home with professional medical care, *at no cost to the surgeon!*

## **PERSONAL INJURY ATTORNEYS**

For the best outcome, attorneys need evidence supporting the significance of their client's condition, strong documentation and minimized costs. *With HHF, this gets done.*

**Make HHF your  
personal injury  
resource partner.**

**It's simple and  
*it's free.***

## **HOME HEALTH AGENCIES**

Home health care agencies want new avenues to grow their patient base that don't tie up, or jeopardize, their working capital. *We make accepting personal injury patients a no-risk, low-competition opportunity.*

## **WORKING TOGETHER**

Day to day, our business is funding personal injury cases for home health agencies; but the broader mission of **HomeHealth Financial** is centered on improving the entire personal injury landscape...*for everyone.*

We've worked on the inside of the healthcare market for over 20 years. We know what you're up against. *Let's talk* about how we can work **together** to deliver better outcomes for the victims of personal injury.
