
About Us

a.k.a. How we add peace of mind.

#1 Your post-surgical patients are in very good hands. YourName Home Health has been working with surgeons and surgical centers for 12 years. Our professional nurses and aides can handle whatever your case requires - wound care, medication management, DLAs, etc.

#2 We're in this for the long haul.

We want to be a long-term partner for you and a seamless extension of the care experience you provide. Patients needing surgery have enough to worry about - wondering what's going to happen to them after their surgery shouldn't be one of them. And, it shouldn't be a concern of yours either. We will review and confirm your post-surgical care orders, and facilitate your patient's recovery, in the familiar, comfortable surroundings of their home.

#3 Accountable, Accessible + Responsive.

We understand things move fast in your world and when you need answers, you want them as quickly as possible. Working with YourName Home Health you will have *two* internal points of contact, 24-hour access to us, and our commitment to fast turnaround on any questions and requests you may have for us.

Helping Surgeons
provide better
post-surgical care
for personal injury
patients

Working with us eliminates:

- ◆ Your out-of-pocket costs
- ◆ Post-surgical phone calls

Home Health

... learn how you benefit ==>>>

YourName Home Health respects the role we play in fulfilling the promise you made to your patient.

PRE-SURGERY

Send us your orders. We'll review, confirm and prepare for care. We'll also verify location of care and check with your patient's attorney to pre-approve anticipated costs. Most attorney's understand the inherent advantages of home health care - lower costs vs. hospital recovery; better/faster recovery experience vs. non-professional care; and a better settlement for your patient.

DAY OF SURGERY

We'll check in to clarify timing of when to arrive at the care location. Post-surgical patients can be confused, apprehensive and (of course) uncomfortable. The closer we can time our arrival with the arrival of your patient, the better.

Simplified office procedures, quality post-surgical care, and peace of mind.

***Better for you.
Better for your patient.***

POST-SURGERY

Our nurse or aide will arrive at the care location with a clear understanding of the care requirements you have specified. We will also inspect the location to make certain there are no safety or health hazards that could result in re-injury or infection. We'll also make certain the patient (*and any present friend(s) or family members who may be delivering patient care*) understands care + medication instructions you've specified.

WORKING TOGETHER

Personal injury patients have enough on their plates, and none of it is easy. The least we can do as care providers is to make certain not to add to their burden. Working together, employing a little teamwork, we can return patients to good health in an organized, effective manner that leaves *everyone* happier!
